OSA 0767-64  
6 February 1964

**MEMORANDUM FOR THE RECORD:**

**SUBJECT** : Comments on Trip Report to SAC  
Contained OXC 6382

25X1A 1. Procedures outlined in OXC 6382 were agreed to by the Project Communications Officer present during subject meeting. In our opinion it represents the best compromise for A-12 reporting that could be accomplished without duplication and excessive expenditures of time, money, and personnel. We are presently working on a Commo Annex for SSB utilization outlining procedures involved in [ ] reporting.

2. With reference to Paragraph 21. It should be noted that the Thule station cannot enter the "Fast Talk" Net since no SAC SSB station is at this location.

25X1A 3. Now that we are committed to the use of SAC SSB "Fast  
25X1A Talk" Net, the techniques for operating [ ] should now  
25X1A be determined. This is pertinent since the A-12 SSB Transceiver  
is used for both SSB reporting into the SAC net and for [ ]  
[ ] reporting. Procedures must be compatible.

25X1A
